Proper local-list star colorings; exact TV=99/199; irrelevant iid leaf noise
Old statistic on fresh controls, m=250
Known null A/A (400 trials)
Known alternative A/B (30 trials)
Population MMD squared
Density
Unbiased MMD squared
1e−4
localized
Old Hamming MMD
Global multiscale max
Honest omnibus V2
Detection probability
Total colorings per generator
Event: center color <=101
Exact event probability
Artificial A
Artificial B
