A Johansson: a correct veto leaves both vertices pending

Global palette; n=64, max degree 10

Original proposals

Proposals (2, 2) → COMMIT (0, 0)

2 pending at cutoff 128

Change only c28: 2 → 0

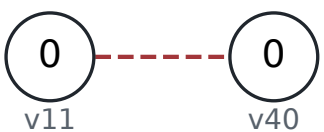
Proposals (0, 2) → COMMIT (1, 1)

Complete at step 11

B GM: a correct veto skips a required repair

Local lists; n=64, max degree 4

Original proposals



Propose 0 → COMMIT 0 → keep 0

1 conflict after queue, step 34

Change only c11: 0 → 1

Propose 1 → COMMIT 1 → write 1

Proper after repair queue, step 34

Circle = current color after the queried step; – = pending. Other vertices omitted.
